

# Mud Mats

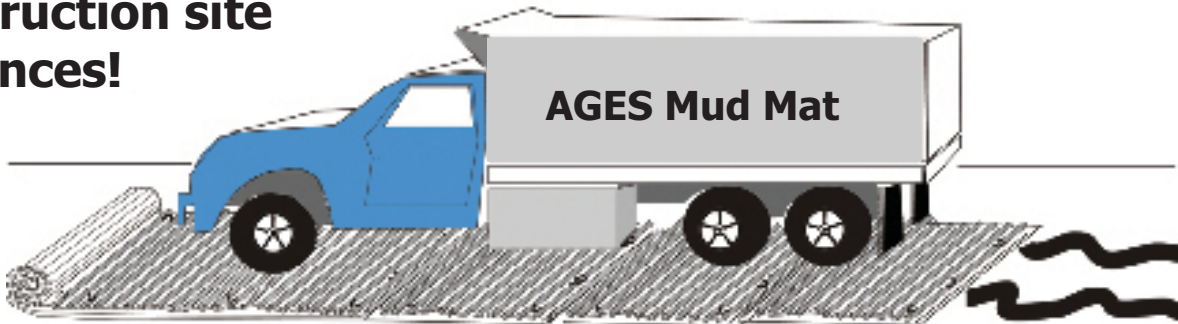

(Patent pending)

## Site Access Matting for Soft Soils and Sensitive Areas

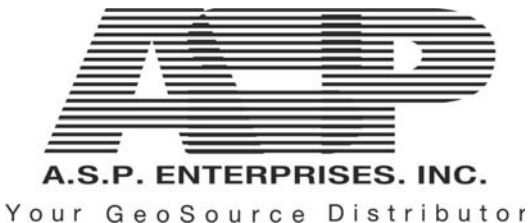

**Perfect for  
construction site  
entrances!**

**Drive on Mud!**

Unroll this amazing new product and drive on any muddy, swampy ground without getting stuck, rutting or tracking mud off site. Mud Mats consist of pocketed, double-wall, high-strength fabric with high tensile reinforcing ribs confined within each sleeve; this allows for easy deployment and amazing structural stability. Mats connect together to form custom sizes. Ground pressure from vehicle tires is reduced up to 40x causing minimal ground disturbance! Roll up when done or move to another location. Light weight, quick to deploy and washes easily. Use confidently in oil & gas construction, agriculture, golf & parks and other delicate areas where vehicle access is required.
