

The **GEOSOURCE UPDATE**

from your Trusted Site Solution Specialists

Geosynthetics | Erosion & Sediment Control | Stormwater Management | Hardscapes

ANNOUNCEMENTS

IECA Virtual Annual Conference & Expo

Join us and the industry's most innovative minds in the erosion and sediment control and stormwater community for the IECA 2021 Virtual Annual Conference and Expo:

- Connect with members and attendees around the globe to discuss the latest industry innovation, attend sessions from top industry professionals and learn from peers.
- Get inspired from keynote speaker, Jim Davidson, as he discusses facing "Everest-sized Uncertainties."
- Interact with IECA members around the world through roundtable discussions and conversations.
- Visit industry booths and interact virtually with representatives to learn more about their products, services and technology.

Learn More and Register at www.ieca.org/annual21

*Read Bill Murphy's Engineer's Note for information about the roundtable he's hosting at the IECA Conference.

Co-locating with the
IFAI Geosynthetics
Conference

Longmont Office is Moving to Loveland

Bowman Construction Supply's Longmont office is moving to a new location in Loveland, Colorado!

The new address of our Loveland branch is:
4495 Woods Avenue, Loveland, CO 80538

We'll be open for business at this location starting **February 15th** and look forward to serving our customers from this new location.

Contact us at 970-535-0863 or salesbcs@bowmanconstructionsupply.com with questions.

PROJECT HIGHLIGHT

Seattle DOT Stratavault Project

Cascade Geosynthetics Assists with Project Solution & Stratavault Installation

Travis Riehl, Technical Sales Representative at Cascade, worked with Seattle's Department of Transportation to find a solution for their urban landscape project that had small, underdeveloped trees and cracked sidewalks.

Stratavault was chosen because it gives trees in urban areas the opportunity for growth. It also provides strength in its design to support sidewalks. At an affordable price, Stratavault is also an excellent stormwater solution.

PRODUCT PROFILE

Stratavault - Soil Cells

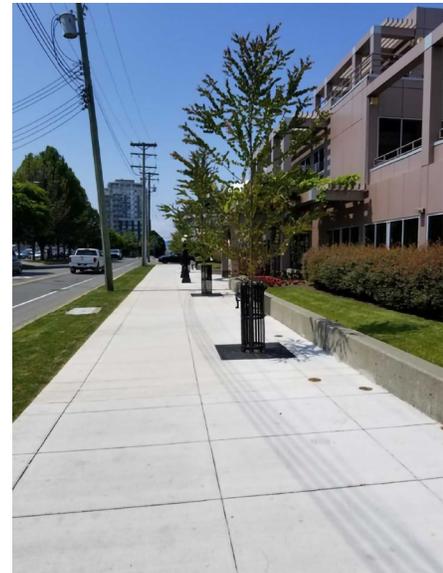

We are thrilled to announce that we have joined forces with Citygreen and are now Stratavault distributors!

Stratavault is an innovative soil cell system that will add life to your urban trees and assure ongoing success for your streetscape projects. Trees in urban areas struggle due to a lack of soil volume for their tree roots. Stratavault soil cells provide structural support to surrounding sidewalks and roads while also creating a void space underneath for soil for the tree's roots to grow. Gone are the days of urban trees dying young and needing to be replaced in 3-5 years. Stratavault gives trees the opportunity to grow and thrive for 50+ years!

Watch our Stratavault Webinar [here](#).

During Installation | After Installation

TECHNICAL TALKS WEBINAR SERIES

We had a great turn-out with our 2020 webinars and we're excited to jump back in to our Technical Talks Webinar Series this year!

Our webinars are for answering questions, sharing technical information and collaborating on projects, plus attendees receive a PDH Certificate for attending. Bill Murphy, P.E. is joined by sales professionals and industry leaders to educate attendees on some of the site solutions ASP, Quick, Bowman and Cascade can provide.

TECHNICAL TALKS

Upcoming Webinars

Platipus Webinar

February 24th, 2021 | 12:30pm-1:30pm CST

[REGISTER HERE](#)

Learn about Platipus' earth anchoring systems in this webinar presentation by Andy Constantine with Platipus.

Platipus Anchors designs and manufactures high-quality ground anchoring solutions that can be used across a wide range of market sectors, including Civil Engineering & Construction (e.g. retaining walls, slope stabilization, bridge repair, pipelines, guyed structures and erosion control), Landscape (e.g. tree anchoring and irrigation systems) and more.

AquaBlok Webinar

March 3rd, 2021 | 12:30pm-1:30pm CST

[REGISTER HERE](#)

Learn about AquaBlok in this webinar presentation by Andy Durham with AquaBlok and our own Travis Riehl.

AquaBlok is a bentonite-coated aggregate that, when hydrated, self-compacts and provides a low-permeability seal that acts as a barrier for water and chemicals. Aquablok can be used for underground erosion control in pipe trenches, as a lining solution, and it is also capable of facilitating wetland restoration by transferring plant seeds to a targeted area.

Presto Geoweb Webinar

March 10th, 2021 | 12:30pm-1:30pm CST

[REGISTER HERE](#)

Learn about Presto Geoweb in this webinar presentation by Sam Justice. Geoweb prevents erosion by confining the infill in its cellular structure, making it resistant to sheet flow and preventing scour on slope surfaces. Geoweb's ability to stimulate vegetation growth makes it a long-term replacement for larger and more expensive rip rap. Geoweb can be used for load support, slope and shoreline protection, channel protection, vegetated retaining walls and more.

ENGINEER'S NOTE

Join us! The International Erosion Control Association (IECA) is holding our Annual Conference virtually this year, but it was originally supposed to be in our own backyard: Kansas City. So we have had these dates circled on our calendar since last year. Speaking of circles, have you ever participated in a roundtable discussion?

No, it is not about literally discussing round tables. It is a collection of people with shared experiences or shared interests coming together to openly share ideas. That's a lot of sharing. And sharing is caring. **As the host of the "Green Infrastructure Bioretention" Roundtable, I am inviting you to join us Thursday, Feb. 25 at 9:10am (central).** Please circle it on your calendar after you go online at www.ieca.org/annual21 to register for the conference.

Each roundtable is limited to 17 participants and is available on a first-come, first-served basis, so do not be late. We would really appreciate a full room, so please block-out your schedule from 9-10:15am on Thursday, Feb. 25, so you can be with us for what is sure to be a fun and informative discussion. Roundtable sessions will not be recorded, so if you snooze, you lose. (Or you can contact me directly to schedule a virtual meeting where I will fill you in on what you missed and only make you feel slightly guilty for not joining me live for the discussion.) Cheers!

Green Infrastructure - Bioretention Roundtable

Thursday, February 25 | 9:10-10:10am CST
