## The Advantages of the Monument HD™ System...

**It's Fast...** Installing Monument HD means you build more, with less. The innovative 1.33 sq. ft. design of Monument HD makes it the most cost effective solution in the SRW industry. It is also the lightest commercial block available, weighing only 60 pounds per square foot. Plus, core filling is optional – saving you even more time and money.

**It's Simple...** "One Unit" construction is a vital element of Monument HD's superior design. 90° corners and half blocks are made simply by removing a portion of the block. No special blocks are required; no special inventories are needed; no shortages occur on the jobsite! Plus, Monument HD's fewer pieces, pinless design, and lower weight per square foot reduce construction time, labor costs, and freight charges.

**It's Strong...** Located on the underside of each Monument HD block, the 3.5" x 5.5" Anchor Bar creates an automatic setback with the highest shear resistance in the industry. When layered with grid and core filled, Monument HD's 4.5" x 4.5" vertical "stone columns" provide a multi-point interlock, for a more uniform block-to-grid connection.

**It's Versatile...** Monument HD isn't just a cost effective wall system for extreme applications. It's seamless and linear appearance is an attractive solution for any type of terrain whether it's commercial, industrial, or governmental. Its patented design and 7° setback make Monument HD perfect for any retaining wall design.
